EXPERIENCE

Backend Engineering Intern — PhonePe, Bengaluru

Jan 2024 – Jun 2024

- Designed and implemented a rate-limiting service in Go using token-bucket algorithm; handles 200k req/min.
- Migrated 3 monolith modules to microservices using Kafka for async messaging.
- Reduced p99 API latency from 320ms to 90ms through query optimisation and Redis caching.

SDE Intern — Infosys (Springboard Project)

May 2023 – Jul 2023

- Built employee leave management REST API in Spring Boot; integrated with HR portal frontend.
- Wrote Postman test collections; achieved 85% API test coverage.

PROJECTS

- Implemented leader election, log replication, and snapshotting following Raft paper.
- Handles node failures and network partitions; tested with chaos engineering (kill -9).

AI Chatbot for FAQ [Python, OpenAI API, FastAPI] — hobby project

- Simple RAG-like setup: embedded company FAQ docs, used OpenAI embeddings + GPT-3.5 for Q&A.;
- Not deployed; built to explore LLMs — interested in learning more about agent frameworks.
