EDUCATION

National Institute of Technology, Kurukshetra

B.Tech in Artificial Intelligence and Machine Learning - CGPA:- 9.47

Kurukshetra, Haryana

Aug 2023 – May 2027

TECHNICAL SKILLS

- **Languages:** JavaScript, HTML, CSS, Java, Python, SQL, C
- **Frameworks & Libraries:** React.js, Node.js, Express, MongoDB, Streamlit, Passport.js, Joi, Scikit-Learn
- **Developer Tools:** Git, Github, VS Code, Postman, Render, IntelliJ, Jupyter Notebook
- **Courseworks:** Operating Systems, Database Management Systems, Machine Learning, Object Oriented Programming, Statistics and Probability
- **Concepts:** Responsive Web Design, REST API Integration, JWT Authentication, MVC Architecture
- **Coding Platforms:** Leetcode

PERSONAL PROJECTS

EventHive | *MongoDB, Node.js, Express.js*

GitHub

- Built a responsive full-stack management platform with HTML, CSS, Javascript and EJS templating for event creation, discovery, and booking.
- Integrated secure user authentication and authorization using **Passport.js**.
- Enabled event booking and payments via **Razorpay** gateway.
- Deployed the application using **Render**.
- Followed **MVC** architecture for scalable code structure with **MongoDB** for storing users, events, and reviews.
- Tested APIs using **Postman** to validate request/response flows.

FlowPilot | *React.js, Node.js, Express.js, MongoDB, JWT* | *In Progress*

GitHub

- Building a task management web application designed for small teams, startups and college groups.
- Developed **responsive** UI using **React.js** with component based architecture, CSS styling and client side routing.
- Implemented secure user authentication and authorization using **JWT** based token system.
- Built **REST API** backend with Node.js and Express.js.
- Completed workspace creation and authentication modules with API integration.

NestHunt | *MongoDB, Node.js, Express.js*

GitHub

- Developed a cross-platform web app for users to find hotels and resorts near their vacation destinations for a leisure experience.
- Used REST APIs for routing and EJS templates for UI.
- Implemented validations using Joi, user authentication and authorization.
- Used MongoDB to handle hotel listings, users, and their reviews.

Movie Recommendation System | *NumPy, Pandas, Streamlit, Scikit-learn*

GitHub

- Built a content-based movie recommender system using machine learning techniques.
- Incorporated and preprocessed IMDb dataset with 5,000+ movies, including genres, cast, and metadata.
- Used vectorization and cosine similarity to compute movie similarity from descriptions.
- Deployed as an interactive web app using Streamlit.

CERTIFICATIONS

• **Data Structures and Algorithms in Java**

Implemented core data structures and algorithmic problem-solving in Java.

Jun 2024 – Aug 2024

Certificate

• **Web Development Apna College**

Built web application using MongoDB, Express and Node.js.

Dec 2024 – Feb 2025

Certificate

ACHIEVEMENTS

Solved **700+** **Data Structures and Algorithms** problems on **LeetCode**

Profile
